Key words: Colorectal cancer; miR-29b-3p; TRAF5; necroptosis; 5-fluorouracil resistance.
Supplementary Figure 1.
Expression of TRAF5 and miR-29b-3p in colorectal cancer cells by RTq-PCR technology. A. The mRNA expression of TRAF5 in HCT116 and LoVo cells was significantly over-expressed after transfection of TRAF5 plasmid. B. The level of miR-29b-3p in in HCT116 and LoVo cells was significantly up-regulated after transfection of miR-29b-3p mimics.
